

Project 2: Bootstrap Website

Background:

Bootstrap is a HTML, CSS, and JavaScript framework for developing responsive websites for both desktop and mobile screens. First released in 2011 under the name of Twitter Bootstrap, Bootstrap is the most popular front-end framework for mobile web development.

Objective:

Develop a custom dynamic website using the Bootstrap. The website design should be intuitive, conform to current web design standards, and appear the same in all major browsers (Firefox, Chrome, Safari).

Website requirements: 3+ page Bootstrap website, functional design in all browser window sizes.

Grading:

This project will be graded on (in order of importance):

- **creative and effective approach to your website design**
- **demonstration of technical proficiency with using Bootstrap**
- **fulfillment of project requirements**
